millions of philanthropic dollars have been spent studying how to improve elections...

- end long lines;
- reduce recounts;
- minimize contests; and
- increase confidence in the most fundamental right of democracy.

but a key issue is increasing trust in the technology of voting...*worldwide!*

WOTING INFRASTRUCTURE IMPENDING CRISIS

8 issues driving this crisis...

- 1. inherent design flaw in reliance on commodity PC hardware due to a...
- 2. lack of security-centric engineering principles exacerbated by...
- 3. incapable legacy vendors lacking core technology design competence resulting in...
- 4. obsolete systems requiring cyber-security triage in a digital arms race dependent on...
- 5. contracts to guarantee spare parts in an insecure supply chain aggravating...
- 6. partisan fights for funding in light of critical infrastructure designation leading to...
- 7. slow progress on design guideline updates further driving a...
- 8. complete lack of commercial incentive for industry to solve on it's own.

focusing on the U.S. for the moment...

~ 36 AR STATES NEED TO FIGURE IT OUT BY 2022

A Presentation of the Open Source Election Technology Institute 5

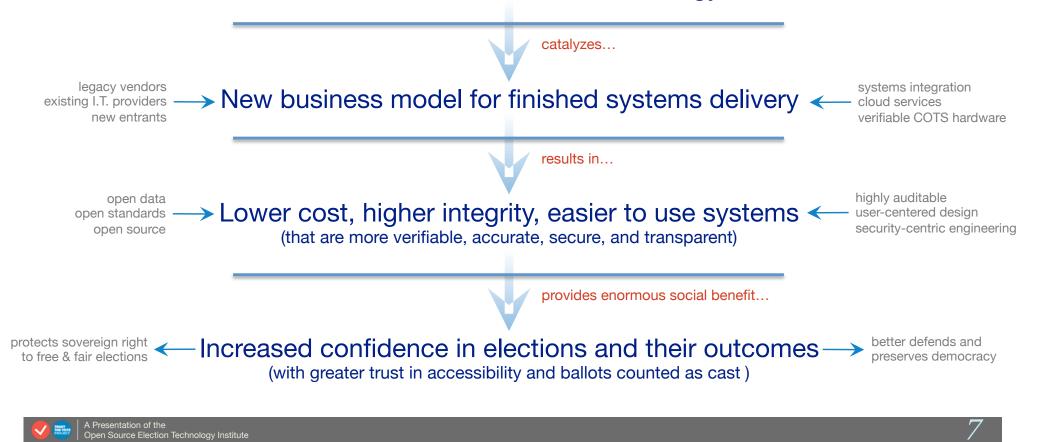

a radical departure; a new arrival...

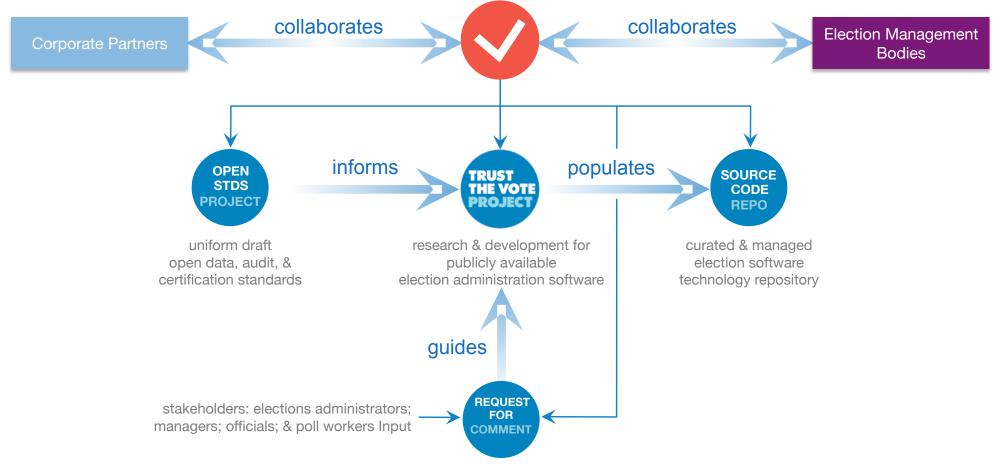

with a global solution...

Public Election Software Technology

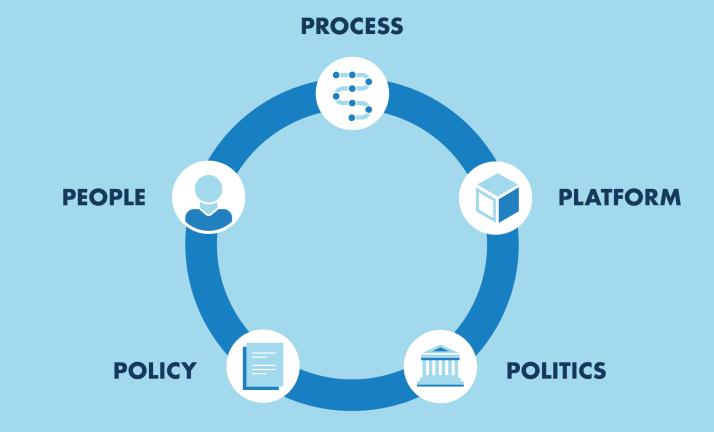

the OSET Institute's approach...

6 main building blocks comprise ElectOS™...

ElectOS[™] represents 10-years of patent-pending election official reviewed system architecture & engineering

A Presentation of the Open Source Election Technology Institute 15

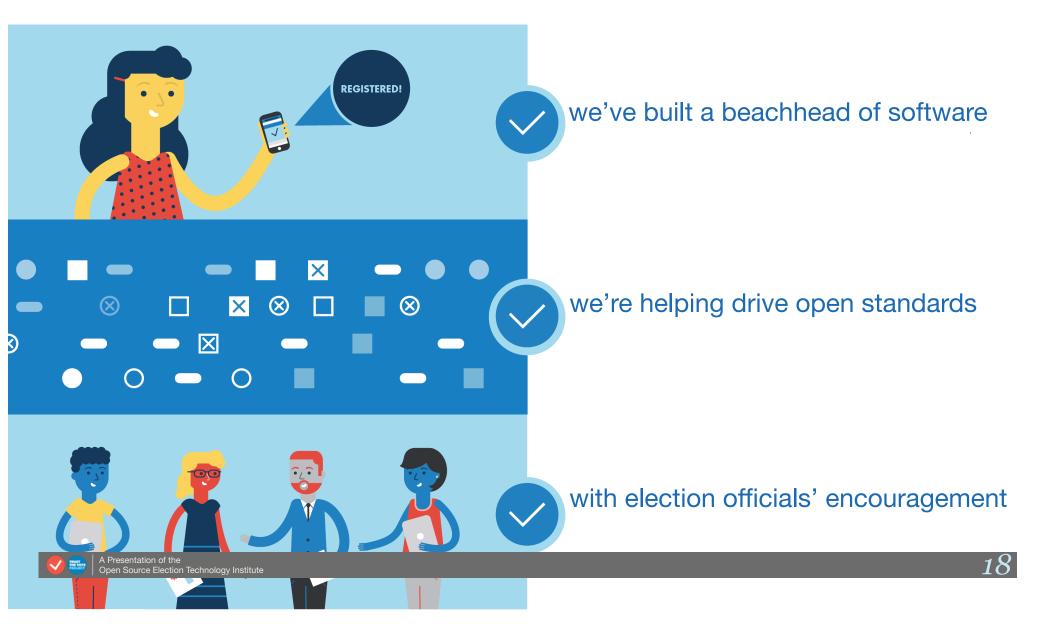

in the U.S. we have a shrinking window to finish... ...or another <u>decade</u> of status quo!

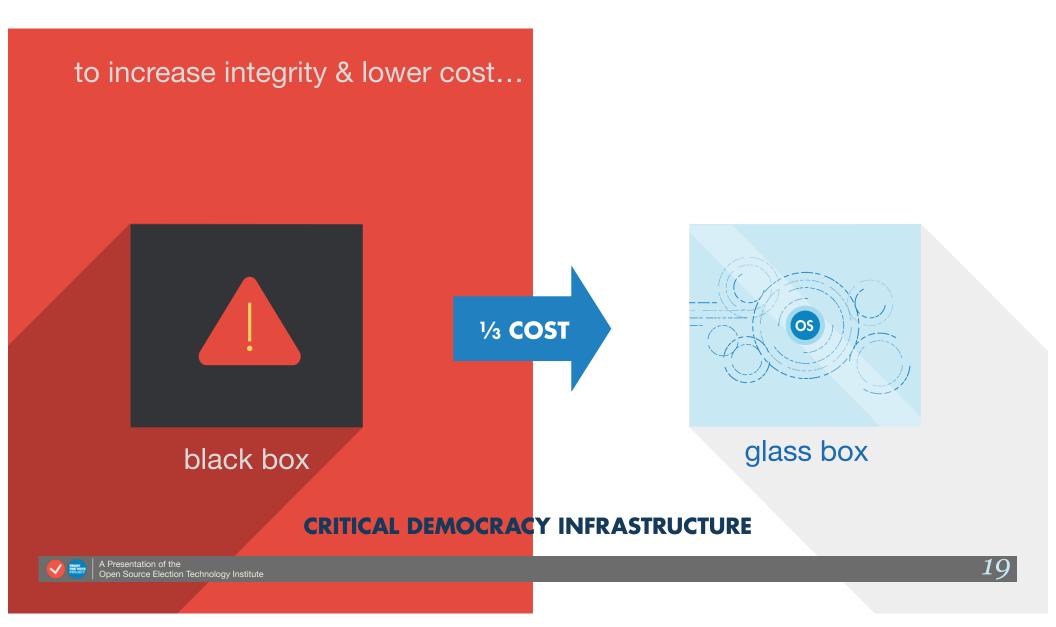

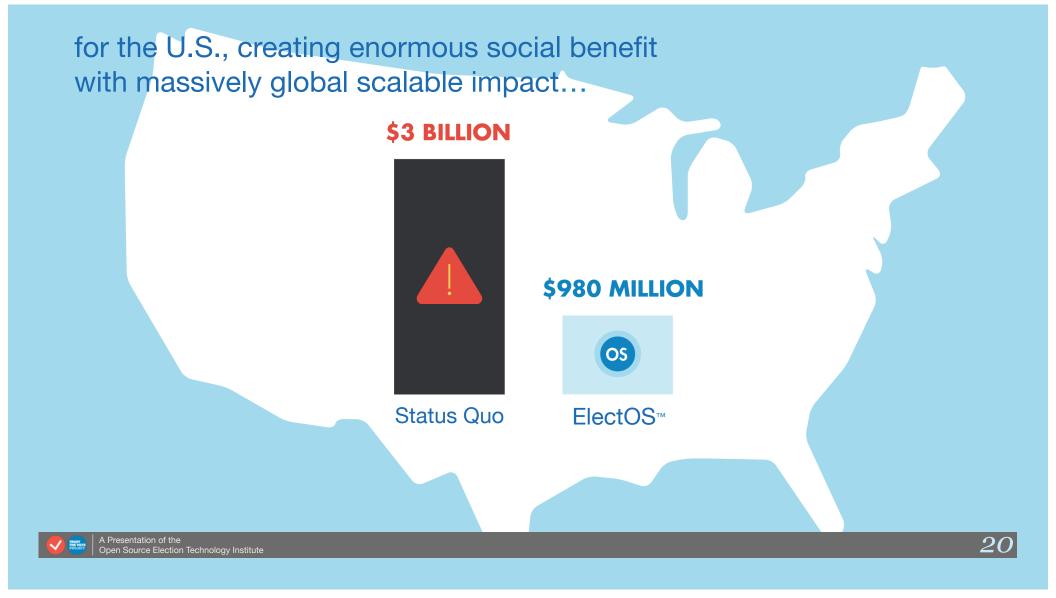

our strategy is delivery because...

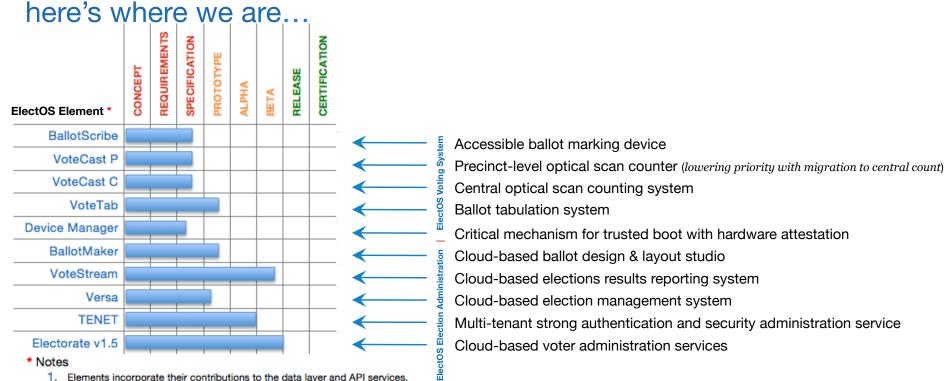

CODE CAUSES CHANGE

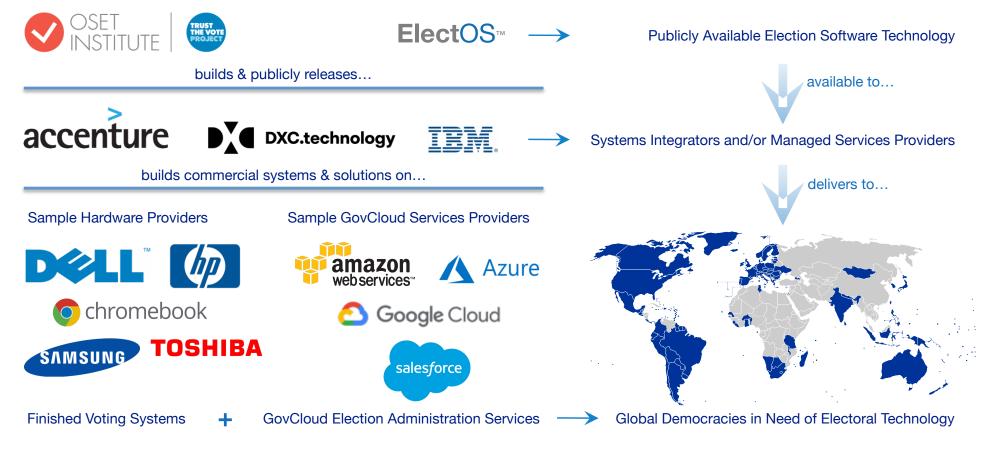

- 1. Elements incorporate their contributions to the data layer and API services.
- Elements embody RFC (Request For Comment) work.
- Electorate v.1 embodies the Voter Services Portal ("VSP")
- Electorate v.2 will embody the Election Management System ("EMS") 4.
- 5. Electorate v.3 will embody the "Registrar" system respectively, as labeled in the Architecture
- Electorate v.4 will embody a new Voter Database ("VRDB").
- 7. This ETF Progress chart does not reflect work on any of: repository and configuration management, open data standards working group efforts, or documentation.

here's how it makes impact...
